

Kinematics of rotational motion

R. Torres
2025 W45¹

¹Phys 20.01 Mod 4. All figures are from Urone (2022), Hewitt (2024), Young and Freedman (2019) unless noted.

Note: This slide deck's content will be available on 11/22. This is because I'm expecting that you'll watch the recorded lecture and complete the embedded section of long exam 4 during viewing, rather than relying solely on these slides. Danke.
